THINKWOOD DECORATIVE WOODS
KOLKATA

INTRODUCTION

The look of stone.
The weight of a sheet.

EcoClad is an exterior-grade flexible cladding: an ultra-thin, lightweight sheet with the face of brick, stone or earth.

Because it is thin and flexible, it goes where real stone cannot: onto existing walls without extra structure, around columns and curved surfaces, and up high facades without heavy loads.

Use it on building facades, boundary walls and balconies outdoors, or on feature walls, reception backdrops and columns indoors. Thinkwood supplies and installs the full range across Kolkata and eastern India.

01

Exterior grade

Made for facades and outdoor walls.

02

Ultra thin

Adds almost no thickness to the wall.

03

Lightweight

No heavy structure or anchoring needed.

04

Flexible

Wraps columns and gently curved walls.

05

Natural looks

Brick, stone, marble, earth and weave.

06

Inside or out

Facades, feature walls and columns.
