

10 FINISHES

Groove in Wood

PROFILE — L-8

PANEL — 2900 × 167 MM

THICKNESS — 9 MM

THE COLLECTION

Groove in Wood

A tighter, shallower reed than the Woodvents range — closer to traditional beadboard, but in a composite that will not swell or split. Ten timber decors from pale ash through to smoked walnut, at their best across full walls, wardrobe shutters and headboards.

Every finish is held against the code printed beneath it. Quote the code and the profile when raising an enquiry, and order the full quantity against a single production batch — shades vary slightly between runs.

Water resistant

Suited to kitchens, wash areas and covered balconies; will not swell like MDF.

Termite resistant

The composite core carries no cellulose food source.

Fire resistant

Self-extinguishing formulation; certificates available on request.

Colour stability

UV-stable decor layer holds its tone in daylight interiors.

Anti-fingerprint

Low-sheen face resists marking on high-traffic surfaces.

Easy to clean

Damp cloth and mild detergent; no wax or polish required.

REFERENCE

Sizes & fixing

PROFILE	NOMINAL SIZE	APPLICATION
Groove in Wood L-8	2900 × 167 × 9 mm	Louvre — tight reed, shutters, headboards, full walls

INSTALLATION

Fix with adhesive on a true, dry substrate, or mechanically to a battened frame at 400–600 mm centres. Allow material to acclimatise on site for 24 hours before installation. Set out from the most visible corner so any cut panel lands where it will be least seen. Retain offcuts from the same batch for later repair.

CARE

Clean with a damp cloth and mild detergent. Avoid solvents, abrasive pads and steam. No wax, oil or polish is required at any point in the life of the panel.

Premium interior and exterior surface materials — supplied, detailed and installed.
