

THINKWOOD · KOLKATA

Tivora

TEXTURE COLLECTION

Twenty-seven quiet textures on a 3000 × 1220 mm mineral composite sheet, 1.5 mm thin. Creams, biscuits, oysters and one clear olive — surfaces meant to sit behind the room rather than in front of it.

THE MATERIAL

A *mineral* sheet, not a laminate

Tivora is a mineral composite sheet — MCS — pressed at 3000 × 1220 mm and just 1.5 mm thick. It carries a dry, textile-like texture across the full sheet, so a wardrobe shutter, a wall panel and a ceiling reveal can be finished from one run with no visible change of tone.

SHEET

3000 × 1220 × 1.5 mm

Full-sheet, wardrobe-height panels with no cross joint — the reason the collection reads as one continuous surface.

SALIENT FEATURES

Made to *last*

Water Resistant

Wipes clean and holds up in humid Kolkata interiors.

Easy To Clean

A closed, low-porosity face — a damp cloth is enough.

Termite Resistant

A mineral composite core: nothing for termite or borer.

Long Durability

Dimensionally stable, and it does not swell or delaminate.

Colour Stability

Pigments hold their tone; no yellowing under normal light.

Fire Resistant

Fire-retardant by composition, not by coating.

FINISH INDEX

Twenty-seven *textures*

M-101	Butterscotch Rise	06
M-102	Cream Cover	06
M-103	Golden Biscuit	06
